Source: CARE (Community Road Accident) database. Figures are generally those as reported by police. Several countries have a significant degree of international traffic which impacts on the number of fatalities in the country. Population data are from Eurostat.

Notes:

(1) Provisional figure - IE (2020-2022), EL (2022)

(2) Netherlands - The number of fatalities registered by the police is under-reported and equates to around 85-90% of the total number of fatalities published nationally. In 2022, the overall total was 745.

(3) Portugal - From 2018 onwards, data includes the NUTS I regions Região Autónoma dos Açores (PT2) and Região Autónoma da Madeira (PT3).
